

UNDUPLICATED HEADCOUNT ENROLLMENT FOR FISCAL YEAR: TABLE 100
BY COLLEGE, MAJOR, RACE AND SEX

This table presents the cumulative unduplicated enrollments for all sessions in a fiscal year. The sessions included in a fiscal year are the second five-week summer session of a calendar year and the fall, spring, three-week pre-session, eight-week summer session, and the first five-week summer session of the subsequent calendar year. The total unduplicated headcount enrollment is represented by the sum of students enrolled for credit with each student counted only once during the reporting period (in this case, fiscal year), regardless of when the student enrolled.

Session enrollment totals include all students enrolled in courses creditable toward a degree or other formal award administered by UNL (administrative site). This includes students enrolled in UNL-administered courses of instruction which are offered for delivery at a location other than the UNL campus. Students are reported by their major field of study. Students are further classified by sex and racial designations. Racial designations in this table do not denote scientific definitions of anthropological origins. The number of non-resident aliens in each category are enclosed in parentheses following the total number in the category. A "non-resident alien" is a student whose reported country of origin is other than the United States. This category includes students who are not U.S. citizens. It also includes those students who are not U.S. citizens but are not required to leave the United States at a future date.

Enrollment figures are restricted to the sixth class day enrollment census. This information is retrieved from the "student statistics" file produced by Computing Services Network from data contained in the Student Information System. Enrollment information in this table corresponds to that provided in reports to the Board of Regents and to the National Center for Educational Statistics.

The Office of International Affairs uses different criteria to establish its database. Therefore, its data will not match the data presented in this table.
